KINGSLEY ALERUCHI JEFFERY CHINDA

AI TRAINER | COMPUTER SCIENCE GRADUATE

Fredericton, NB | (506) 238-8426 | aleruchichindanigeria@gmail.com

PROFESSIONAL SUMMARY

Computer Science graduate from the University of New Brunswick with two years of experience in AI training and model-response evaluation. Experienced in grading AI outputs for correctness, instruction-following, completeness, clarity, and reasoning quality; identifying contradictions, unsupported claims, and off-task responses; and writing precise, structured feedback. Strong research, analytical reasoning, technical writing, and independent remote-work skills.

PROFESSIONAL EXPERIENCE

AI Trainer | Handshake AI | Remote | 2023 - 2025

- Evaluated and graded AI-generated responses for factual accuracy, relevance, reasoning quality, completeness, clarity, and adherence to detailed instructions and evaluation rubrics.
- Compared model outputs and identified incorrect reasoning, contradictions, unsupported claims, missing context, and responses that did not answer the question asked.
- Wrote clear annotations, rationales, and structured feedback explaining why responses succeeded or failed against project criteria.
- Handled technical and general-domain prompts, using research and careful judgment to verify claims and assess answer quality.
- Adapted to changing guidelines and ambiguous tasks while maintaining consistent evaluation quality in an independent remote environment.

Residential Support Worker | Fredericton, NB | Aug 2022 - Present

- Provide individualized support while maintaining a safe, respectful, and structured living environment.
- Complete shift documentation, incident reporting, and handovers accurately and consistently.
- Respond to unexpected situations using sound judgment, careful communication, and problem-solving skills.

EDUCATION

Bachelor of Computer Science | University of New Brunswick, Fredericton, NB | May 2025

TECHNICAL SKILLS

AI Evaluation: Model-response grading, prompt evaluation, response comparison, data annotation, quality assurance, rubric-based assessment
Programming: Java, Python, JavaScript, C#, SQL, HTML, CSS
Tools: Flask, Vue.js, Unity, Git, GitHub, Visual Studio Code
Core Strengths: Analytical reasoning, research, technical writing, fact-checking, instruction following, problem solving, documentation, written communication

SELECTED PROJECTS

Full-Stack Web Application

- Built application features using Flask, Vue.js, APIs, and database technologies; implemented data retrieval and update workflows and debugged application issues.

Machine Learning Coursework

- Applied classification and model-evaluation concepts using K-Nearest Neighbours and Naive Bayes; analyzed model behaviour and results.

VOLUNTEER EXPERIENCE

Robotics Team Member / Volunteer | Nigeria

- Collaborated with team members on robotics projects, contributing to the design, assembly, programming, and testing of robotic systems.
- Troubleshot hardware and software issues by identifying errors, testing possible solutions, and refining implementations based on results.
- Applied logical reasoning and programming concepts to solve technical problems and improve system performance.
- Participated in team discussions to evaluate different approaches, explain technical decisions, and develop practical solutions.

Coding Instructor / Volunteer | Nigeria

- Introduced children to foundational programming and computer science concepts through clear, beginner-friendly explanations and hands-on exercises.
- Reviewed students' work to identify logical errors and misunderstandings, then provided specific feedback and step-by-step guidance.
